Description: Research Assistant (Remote) A ; Apply @ Keystone Recruitment - APAC (Remote)

About the job * Role: Research Assistant (Remote) * Location: 100% Remote (Global) *

Compensation: USD35-45 per hour Role Overview One of our clients is partnering with a leading AI research team on a large-scale supervised fine-tuning (SFT) initiative aimed at improving how advanced language models respond to real-world questions. We are seeking strong writers and critical thinkers to contribute as independent contractors on a flexible, project-based basis. This opportunity is ideal for individuals with excellent reasoning and communication skills who are interested in contributing to applied AI research while maintaining control over their schedule. Key Responsibilities * Create realistic prompts that reflect how people naturally ask questions across general topics * Review and edit AI-generated responses for clarity, accuracy, and usefulness * Write high-quality human-authored responses to selected prompts * Generate small variations of prompts to test nuanced differences in model behavior
